Great for school it helps explain more than teacher and books in school It's the only way I am passing my Anatomy and Physiology class.

This is really helping me keep up with A&P! It's color coded so I know exactly which cards to carry

around with me during each section.

BY FAR THE BEST STUDY TOOL YET!! These were perfect, and covered almost exactly what was in my text for A&P. I carried these with me everywhere I went, and many of my fellow students ordered some as well. If you are taking A&P these flashcards are a must! Some of the cards even had explanations for some of my essay questions!!

It's a great study has looks of details and shows you different views of the structures. The one thing I do not like is that they will slightly change the name of the same structure on 2 cards. For example on a card for the skull they put the structure is the mental canal of mandible. On the next card which is a side view of the skull they say it's the mental foramen of mandible. It's not a big deal but it is on several cards.

I love it! It's really nice and super helpful for anyone who want something more portable to carry around and study rather than a text book.

These are great assets to my arsenal against those long hours in A&P mode. These where the preferred study cards in my study group because of their amazing detail to both pictures and explanation of definition. Some of the pictures where too graphic for the women actually, but I wouldn't ask for any less. Firstly we had to identify what information on the cards weren't important to the class, and then the study lead to everyone getting an A or B. Best of all I only used half of them for A&P 1, the other half will be used in A&P 2! I'm part of Texas's education curriculum.

It's a great review cards and it's small so you can take it any where. As I am writing this review I just got done using the flash card ...it's awesome a lot of information in small card .as I said you can carry it around.

these are very detailed, nicely organized and very helpful. you can take out what you need and don't have to carry around all of them.
