Customer Reviews
I purchased this book after attending the SPPM ultrasound course. It is an in depth coverage of every single US guided injection you can think of. The directions are excellent, and step-by-step,
detailing multiple approaches that you may be interested in learning for ultrasound-guided interventions. I also liked that they cover pathophysiology, indications, risks, and anatomy related to each procedure. The high quality photos are very helpful in also learning diagnostic US. I would recommend this for anyone thinking about learning US, or adding US to the practice. Also, I would highly recommend the course. The SPPM course I attended was my 3rd US course overall. Dr. Waldman has put together a great team of experts that really accelerated my comfort utilizing US for interventional pain management including supra scapular, inter scalene, subacromial, glenohumeral, AC joint, medial/lateral epicondyle, knee, ankle, SI joint, cervical medial branch, and caudal blocks. Overall, this was a great investment and well worth the money.
