Says to Just Click on the Link Below...no live link to click. Not impressed with the eight pages of black-heavy pictures here. Then there are the small coloring spaces. If you use markers the pictures would be so smeared that you wouldn't be able to see what exactly you were coloring. Won't be trying to get the pdf for this one...already deleted from my K4PC. When we buy coloring books in stores we can look inside to see if we like the designs and check for any designs we already have. WHY Not Here On ??

This has been one of my favorite coloring books by far I love the designs. Each page is complex but easy enough to complete in one sitting. I have nearly completed the book and will buy some of the other books in this series. One thing about this book is the paper is really nice with a smooth texture that takes ink really smoothly with full coverage without requiring going over multiple times. The pages are perforated so they can be removed and used as journal pages or framed. I use markers and unfortunately they bleed through the page so the reverse of the page is dotted up with bleed-through but there isn't much help for that. Also, the designs are all different but have similar design elements from page to page so the lack of variety in the details might not appeal to some, Otherwise I love the book myself and highly recommend it. I used a wide variety of pens - sharpies, color pencils and gel pens.

I absolutely love this book! My only question is, why did you stop after only 8 pages? You need to publish a 50 page book!

Wonderfully detailed images!
