Customer Reviews
We have a reflexologist who comes to our home every other week to work on my 89-year-old mother, my husband, and myself. Under his care and for the first time in years, my mother is off all pharmaceutical meds, and has perfect blood pressure and cholesterol levels. When I visited China last year, I went to a TCM and was amazed at the accuracy of his diagnosis (better than the naturopath and the primary care physician back home!) so I was mentally open and ready to learn more about TCM. Our reflexologist loaned us his copy of this book and, after reading it, I knew we had to have one of our own. Highly recommend this book for the information provided (although it's not always the easiest reading).

This book is awesome and arrived when I expected it too
