I'm studying for the boards and this is the best study material I've found so far. Quips: some of the annotated images don't zoom on the iPad with any useful resolution. The 150 online cases require Flash and don't work on the iPad. If you're haunting coffee shops like me, curled up with your glowing tablet, this is something of an issue. That aside, reading through these books a few times will get you in a solid place to handle the topic. Way way better than Case Review.

I was previously using the Case Review series throughout most of my residency, when I discovered this series during my senior year. Thank heavens because RadCases is the way to go. There are only 100 cases per book, which makes it easier to get through. All of the cases are reasonable (unlike Case Reviews challenge section). MOST Importantly, the answer format gives you a Top 3 differential and best answer which is more how "real" case conferences are.

I like the radcases series, they seem to have more relevant cases than some other review series. There are a lot of typos in the book but they don't seem to distract from the learning too much. They explain the imaging findings after each case and give nice pertinent info. I would recommend these books.

This was a great review book for boards. This series was my favorite for Oral board reviews (radiology). Pictures are good, cases are good.

There is a good variety of cases. Good image quality and explanations. Provides good review for board certification. Recommend this book.
