Guided Care: A New Nurse-Physician Partnership In Chronic Care

Synopsis

Winner of the 2009 Medical Economics Award! Boulton and his colleagues . . . have crafted a team model that builds upon the unique strengths of nurses and primary care physicians coupled with effective communication and implementation of evidence-based care. This represents a great advance over business as usual.--David B. Reuben, MD, Director, Multicampus Program in Geriatric Medicine and Gerontology, Chief, Division of Geriatrics, David Geffen School of Medicine at UCLA

Guided Care is an exciting, new team model used to provide medical care to clients with chronic conditions. This model involves adding a Guided Care nurse to the primary care practice team. It is also the most efficient, cost-effective way to respond to the needs of patients. This book provides physicians, nurses, administrators, and leaders of health care organizations with step-by-step guidance on adopting Guided Care Nursing into their practice. Featured Highlights: Evaluating the primary care practice's readiness to adopt Guided Care Preparing for adoption Integrating Guided Care into existing practices Hiring nurses for the primary care team Assuring financial viability Comparing Guided Care with other models The future of primary care, and the quality of care for adults with chronic conditions, depends on finding approaches to improve efficiency and effectiveness. This book demonstrates that Guided Care yields the best outcomes for patients and for primary care at large.

Customer Reviews

This is a concise guide to providing chronic care services to seniors. Not a lot of science, rather full of

pragmatic tools.

Important information on how to get patients to follow adequate advice and change unhealthily behavior. Understanding and subsequent compliance is more difficult to realize than diagnostic testing. Clear communication between provider and patient is necessary to determine what the problem is and how to BEST resolve it.
